

GK 2000 SERIES GREENHOUSE SYSTEM

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

The Standard for the Northwest

The **GK 2000 Series Greenhouse System** is the standard for the Northwest due to the simple yet effective design. The 2000 Series will help contain heat and humidity for cuttings and starting plants.

All bows, posts, purlins, wind braces are pre-punched and indexed for fast and easy assembly. All bends are made hydraulically with a bending system that ensures uniformity throughout the formed components.

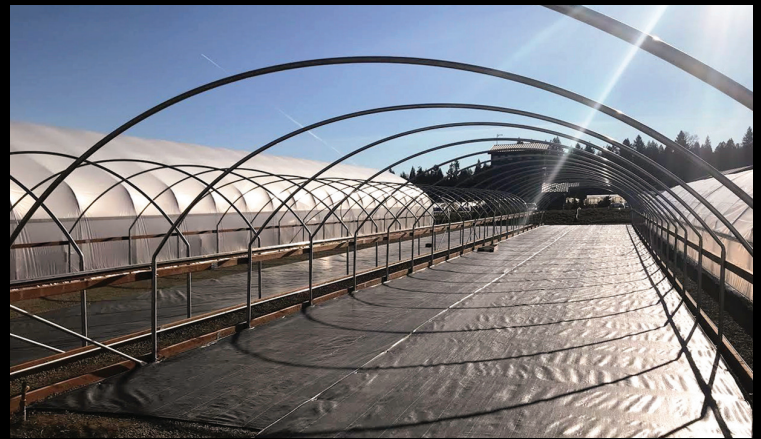

GK greenhouses come with an instruction manual, parts checklist and installation hardware for a complete package. Door and end wall kits provide plenty of width and height needed for entering and exiting the house.

Standard House:

- 20' Wide Designs
- 4' / 5' / 6' Spacing
- Standard 4' Sidewall Height
- 8' 6" Center Height
- 1 Purlin Run (top center)
- 2 Corner Wind Brace Kits (48' or under)
- 4 Corner Wind Brace Kits (50' or longer)
- Made from Galvanized Steel

Options:

- Large selection of doors
- Selection of end wall types
- Roll up side kits
- Shutters and roof vents
- Truss system available for hanging plants
