

Contract Manufacturing

Combining Technology & Tradition Since 1976

The farmer-designed Lettuce Harvester increases efficiency, creates faster processing times and gets fresh product to market faster!

Lettuce Harvester

- Double sided harvest platform, drives either direction, rotates 360 degrees, with steering controls that align with direction of travel
- Rubber track undercarriage reducing field compaction, hydraulic side hill leveling to keep platform level
- High amp 12v DC alternator paired with dual 3000W continuous duty inverters provide 110 vac power, 6000 watt continuous, 12000 watt surge to heat sealers without carrying extra generator.
- Entire platform constructed from stainless steel including double stainless water tanks
- All shades and tables fold in or down to enclose machine for transport, extension tables have on-board storage locations
- Both sides of the machine have shade structures to increase crew comfort
