

GK SHADE TRAILER

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

GK SHADE TRAILER

Field and outdoor workers can enjoy shade and seating that provide a comfortable place to rest, refresh, and get away from the elements. Perfect for outdoor workers at nurseries, farms, vineyards and construction sites!

The new GK Shade Trailers are designed and built to easily travel from location to location. The folding shade top folds for transport and won't blow over at the first sign of wind. A shade trailer weighs approximately 850 pounds and measures 14'6" long and 5'11" wide (when shades are closed).

The trailer provides seating for up to 8 people and comes standard with built-in garbage can, wood decking and standard 2" ball hitch. The trailer includes space for coolers and/or Igloo coolers to provide plenty of water for outdoor workers.

GK Shade Trailers are in compliance with new Oregon workplace regulations for extreme heat. They offer excellent worker protection for the prevention of heat illness and stress.
