

GK PRUNING TOWER

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

STRONGEST, FASTEST AND MOST POWERFUL PRUNING TOWER ON THE MARKET!

SAFETY

GK Machine's new pruning towers were designed with the operator's safety in mind. The boom and frame are the strongest in the industry. The foot enabled safety switch prevents unintended movement. A fully enclosed operator's platform protects the operator from falling branches and debris. The basket is equipped with a safety latch and safety harness hook.

EASE OF OPERATION

The GK Pruning Tower controls are easy to use and maximize the operator's comfort and productivity. A single joystick controls the movement and a foot pedal controls the lift.

FAST AND EXCELLENT MANEUVERABILITY

Maneuvering the pruning tower in tight places is easy with the smooth operation of the low ground speed drives. When switched to high-speed, speeds up to 6 mph are reached shortening the time spent driving to and from the orchard. Converting it for towing can be done in a matter of minutes with no tools required.

RELIABLE AND DEPENDABLE

Power is provided by a dependable 32HP Tier 4i diesel engine. The reliable hydraulic pumps, wheel motors and rugged planetary drives are designed to provide the best torque and speeds while using power efficiently.

BUILT TO LAST

The boom arm is the strongest in the industry. The large boom cross section provides more rigidity resulting in less boom whip at the platform. The leveling arm and plumbing are completely enclosed inside the boom preventing sticks and debris from getting caught as they fall. Heavy gauge engine compartment doors, are dent resistant and protect vital components from falling limbs. The powder-coat finish provide the best long-term protection from the elements.

GK MACHINE'S NEW PRUNING TOWERS ARE BUILT TO THE HIGHEST QUALITY STANDARDS AND WILL PROVIDE YEARS OF MAINTENANCE FREE PRUNING.

GK PRUNING TOWER

COMBINING TECHNOLOGY AND TRADITION SINCE 1976

SAFETY

- Strongest boom on the market
- Largest boom cross-section in the industry for less platform movement
- Fully enclosed platform with safety latch on door and safety harness hook
- Foot enabled safety switch to prevent unintended movement
- Engine equipped with safety shutdowns

FEATURES

- 32HP, 3-cylinder Tier 4i diesel engine
- Fuel efficient engine with 3 preset engine speeds to match work being performed
- 2 moving speeds (working and travel)
- Large 20-gallon fuel tank for increased operating time
- Heavy-duty boom hinge points with hardened steel bushings
- Quick toolless towing conversion and high-speed towing
- Powder coat finish for lasting durability

SPECIFICATIONS

- | | |
|---------------------------|-------------------------------|
| • Overall Length | 21 feet |
| • Length without Boom | 11 feet |
| • Overall Width | 9 feet 6 inches |
| • Maximum Boom Height | 20-feet to base of basket |
| • Minimum Platform Height | 18 inches to step into basket |
| • Weight | 3,800 pounds |
| • Drive Tires | 31 x 15.5 flotation |
| • Caster Tires | 9.5 x 15 ribbed |
